

Foundry Expertise

Castings. Quality Finished. Faster

Increase Your Finishing Throughput

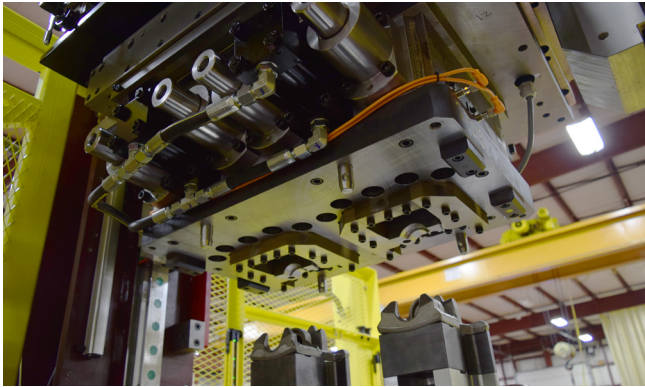

For over 30 years, ATS has grown beyond just a tooling provider into an OEM to offering engineered craftsmanship for a robust, all-in-one solution for foundry finishing rooms. We produce high-quality trim tools and presses built specifically for the challenging process of foundry trimming. We offer custom automation and finishing equipment to resolve production issues and bottlenecks.

Foundry Expertise

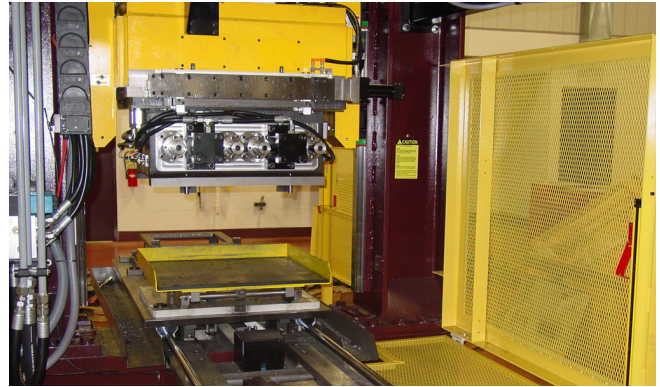

Castings, Quality Finished, Faster

Trim Tooling

ATS trim tools are designed and built for any press, foundry, or unique need.

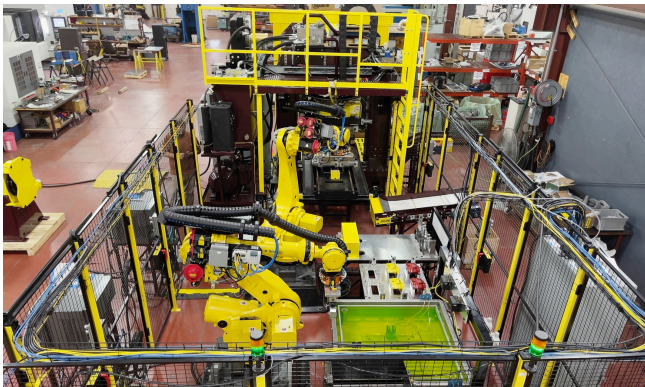

- Low- to high-complexity models
- Multi-axis trimming
- Array of materials: ductile iron, aluminum, gray iron, copper, brass, magnesium, etc.

Trim Presses

ATS premier hydraulic trim presses are unparalleled, finishing castings faster than any other method or equipment on the market.

- Multiple frame & tonnage options for low-to high-volume models
- High speed shuttle or dial table
- Part sensing for tooling protection

Automation & Custom Equipment

ATS automated finishing cells and integration improve the quality of surface finishing operations to solve production issues.

- Automated QC integration
- Custom gate removal saw
- Robotic grinding cells

Single & Dual Wheel Stand Grinders

ATS finishing equipment is engineered for optimal performance, eliminating finishing room bottlenecks with a custom solution.

- Designed for Diamond & CBN Plated Wheels
- Reduce hazards common with resin-bonded wheels
- Decrease maintenance costs & down time
