Clean, Stack, Count Fast

Advanced Slip Sheet Cleaning System

Easy start-up process automatically raises the infeed and outfeed lifts to operational height, starts the conveyor, vacuum and cleaning brushes.

Additional options and configurations are available. Contact ATS for a complete list of specs and options.

Designed For Your Operations

- Hydraulic Infeed/Outfeed lift table with 36" travel and 4,000lb capacity
- Adjustable upper/lower brushes for thorough cleaning
- Powerful dust vacuum system to capture dry debris
- High-capacity 60"x72" conveyor, 240 ft/min. max. speed

Simple & Safe Control System

- Integrated HMI/PLC with sheet counts, batch set points, alarming
- Safety PLC for circuit control
- Infeed/Outfeed Light Curtains for safe operation
- Auto mode for production, manual for maintenance

Comprehensive Cleaning

Dust collection vacuum and adjustable upper/lower rotating brushes remove dry debris.

Intuitive Auto Lift Operation

The infeed lifts automatically maintain ideal operator sheet pick height. Similarly, Auto Lowering Function on the outfeed maintains ideal lift height for precise stacking.

Handle and Count Easily

Our Static Removal System on the infeed and outfeed makes handling slip sheets easier for a more reliable count.
